

MiniMax

MMX R-3

Function

Rig Wash

Product Data Sheet

Product Description

MiniMax R-3 is a water based composite compound fluid, created for cleaning oily surfaces and casings on rigs, refineries, ships and other equipment in the oil & gas industry. **MiniMax R-3** is a non-aggressive and biodegradable product which meets the highest environmental North Sea standards and is HOCNF approved.

Applications/ Functions

MiniMax R-3 will be used as a mixture with water (1:3) to remove grease and oil-based compounds.

Advantages

Biodegradable, non-aggressive and non-flammable.
Easy to use, no extra-ordinary protection required when applied.
Helps reduce clean up time through its high performance potential.
HOCNF approved and Cefas registered.

Typical Properties

Appearance	Clear liquid
Boiling point	100 C
Melting point	0 C
pH	12.85

Recommended Treatment

MiniMax R-3 is ready to use, process of use is spray on with low pressure, hose off with high pressure. The water run-off, containing **MiniMax R-3**, can be drained through the rainwater drain system. This can be either the op-drain system or the closed drain system in areas where hydrocarbon contamination is expected.

Packaging

MiniMax R-3 in 200 Ltr. barrel or 1000 Ltr. IBC
